

TOOBA TARIQ

SOFTWARE ENGINEER | DATA ANALYST

+92 3309199678 | toobatariq114@gmail.com | Rawalpindi, Pakistan | <https://www.linkedin.com/in/tooba-tariq->

PROFILE

IBM-certified Data Analyst and Software Engineering graduate with hands-on experience in SQL, PostgreSQL, Power BI, DAX, Power Query, Python and data modeling. Skilled in analyzing relational data, building end-to-end analytics solutions, and creating interactive dashboards that turn raw data into clear business insights. Strong foundation in programming and databases, backed by a professional certification and independent project work in data analytics.

WORK EXPERIENCE

Data Analyst Trainee | Excellence Delivered (ExD), NASTP, Islamabad Jun 2026 – Sept 2026

- Cleaned, modeled, and analyzed datasets using SQL, PostgreSQL, Python, and Excel
- Built ETL pipelines and interactive Power BI dashboards to support data-driven decisions
- Handled the full analytics workflow from data preprocessing to insight delivery

PHP Developer Intern | Elabd Technologies, Islamabad Jul 2023 – Sept 2023

- Developed responsive web pages using HTML, CSS, and Bootstrap, translating mockups into functional, cross-browser-compatible interfaces
- Debugged UI inconsistencies across browsers, improving layout consistency and visual polish
- Collaborated with the dev team through code reviews and daily stand-ups; built responsive navigation components

SELF-DRIVEN PROJECTS

Urban Basket | Retail Database & SQL Analysis (*PostgreSQL*)

Designed a PostgreSQL relational database using strict constraints, performed advanced SQL analysis (CTEs, window functions, joins), and built an interactive Power BI dashboard to track multi-store retail performance, sales trends, and order fulfillment.

Metro Care Hospital | Patient & Appointment Analytics Dashboard

Developed an end-to-end Power BI analytics solution using PostgreSQL dataset and a structured star-schema data model also performed data transformation in Power Query and developed DAX measures using functions for dashboard analysis.

BookNook Books | Data Analytics Pipeline (*Python, PostgreSQL, SQLAlchemy*)

Designed a database schema with SQLAlchemy and built an ETL pipeline using pandas to clean and load order data. Analyzed it with NumPy/SQL and visualized insights using Matplotlib, Seaborn, and Folium.

PROJECTS

Escape Breakout (Final Year Project): Designed and built a space-themed puzzle game in Unity/C#, implementing custom level logic, collision handling, and progressively increasing difficulty.

Gibbets: Bow Master: Built a physics-based archery game in Unity/C#, implementing real-time trajectory calculations and a precision-weighted scoring system to balance gameplay.

Food Munch Café: Developed a full-stack campus food-ordering platform (HTML, CSS, Bootstrap, MySQL) supporting menu browsing, cart management, and order tracking from checkout through fulfillment.

Bank Management System: Built a C++ banking system with secure user authentication, account management, and transaction logging, automating deposits, withdrawals, and fund transfers with audit-ready reporting.

Hotel Management System: Designed a modular hotel operations system in C++ using OOP principles, separating booking, billing, and room-management into independently testable components.

Lottery Management System: Built an automated C++ lottery system with randomized draw logic and dynamic prize-list management.

EDUCATION

Bachelor of Science in Software Engineering

2020 – 2024

Capital University of Science and Technology, Islamabad

TECHNICAL SKILLS

Data Analytics: MySQL, PostgreSQL, Power BI, IBM Cognos, DAX, Power Query, Microsoft Excel, Google Sheets, Python, Data Modeling, Data Visualization

Programming & Core Concepts: C++, C#, JavaScript, Object-Oriented Programming, Data Structures, Databases, Computer Networks

Web Development: HTML5, CSS3, Bootstrap

Tools: Database Schema Design, Unity, Git, GitHub, VS Code, MS Office

CERTIFICATIONS

- Dean's Honor Roll
- IBM Data Analytics Professional Certificate
